## FRAME FEATURES

### **SOLID WOOD FRAME**

Solid wood frame is kiln dried to prevent warping. Plywood used for shaping is always backed with solid wood

### **EXTRA THICK WOOD**

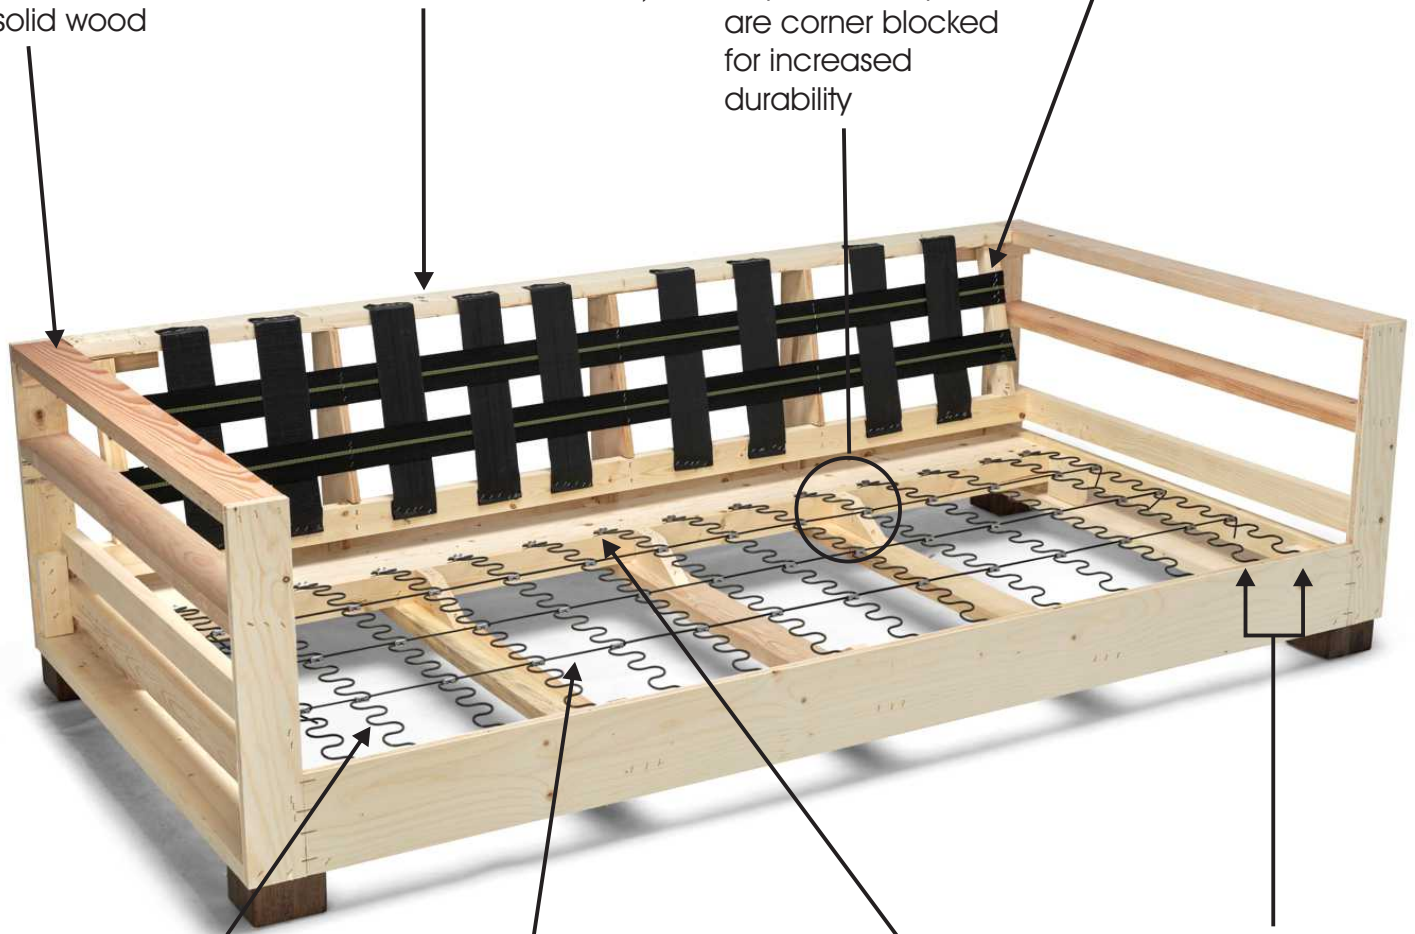

1 & 1/8th of an inch lumber is used for additional strength. (Most furniture frames are 3/4 inch)

### **GLUED AND CORNER BLOCKED**

All joints are glued and stapled with 2" glue coated frame staples. Stress points are corner blocked for increased durability

### **ELASTICISED WEBBING**

Provides support for back cushions and helps to prolong the back cushion's life

### **NO SAG SPRING SYSTEM**

"S" shaped springs provide long lasting support and superior comfort. 8 gauge wire is used on seat springs and 11 gauge on sprung backs

### **LATERAL STABILIZERS**

Produce a more "up and down" ride by distributing the weight over multiple springs

### **EVERWARE COATED SPRING CLIPS**

Prevent squeaking caused by metal to metal contact

### **EXTRA CORNER SPRINGS**

Additional springs in the corners provide extra support and reduce roll into the corner

# Architect | FINISHING FEATURES

## **FULLY PADDED FRAME**

Outside back, sides and front are padded to increase durability and provide more attractive tailoring

## **FEATHERSOFT BACK AND TOSS PILLOWS**

A 50/50 blend of small waterfowl feathers for comfort and fibre fill for resiliency

## **SEWN BAFFLES**

Horizontal baffles sewn into the back cushion inserts minimize shifting of fill materials

## **EXCEPTIONAL FINISHING**

Details such as piping, zippered back and seat cushions and pattern matching provide a better finished piece

## **HIGH DENSITY FOAM**

Dense foam ranging from 2.0 to 2.75 lbs provides longer lasting comfort and support

## **FEATHERSOFT PLUS SEAT CUSHIONS**

Cushion cores are wrapped in a comfort layer of super soft foam. Cores are then wrapped in 50/50 feather and fibre blend filled casing

## **BAFFLED SEAT CASINGS**

Sewn baffles reduce the shifting of the feather fill to help keep the cushions shape

## **SELF COVERED DECK**

Deck material matches the body fabric. No unsightly white decking material

### FEATHERSOFT PLUS SEATING

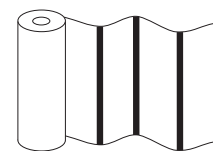

A feather cushion requires more maintenance. While the baffled cover is designed to minimize shifting, the nature of a loose fill toper is that the feathers and fiber are free to shift. This means the cushion will exhibit a "lived in look." This shabby-chic look is the desired look of this cushion. Fluffing and rotating the cushions frequently will be required.

While the cover is designed to minimize feather escape, it cannot eliminate it completely. Some feather escape will happen. There is a tradeoff between comfort, breathability and containing the feathers. The cover selected balances an acceptable amount of feather escape with maintaining a level of softness.

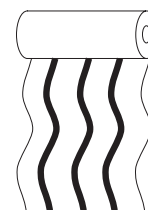

For those customers who prefer a more tailored look or have feather allergies, all Architect styles may be ordered without feathers. Seat cushions will be substituted with our 2.75 Ultracell cushion core. Back and toss pillows will be filled with dacron fibre. These changes are available at no charge.

### CUSTOMERS OWN MATERIAL (C.O.M.)

All Architect cutting patterns are railroaded, thus fabrics are cut to railroad on the furniture. Fabrics which run up the roll will therefore be handcut. These fabrics will require more yardage and incur an additional charge. An example of each is shown to the right. Fifty-four inch wide fabrics not railroaded when applied to long cushions, or narrow fabrics not railroaded when applied to most cushions will require seaming. The factory will position these seams at its discretion. If special placement is desired, it must be stated on your orders and an additional cost will apply. Unless a customer gives special instructions with orders as to the application of fabric, our own judgement will be used in applying the fabric.

"Railroaded" fabric

"Up The Roll" fabric

For a Customer's Own Material (C.O.M.) with patterns 54" wide or less please supply extra yardage as indicated below:

Fabric Width	Repeat 5-15"	Repeat 16-21"	Repeat 22-30"
54"	25%	30%	35%
48-53"	35%	40%	50%

This is strictly a guide only. There may be orders due to unusual designs or repeats of the fabric that will require additional yardage. This may not be known at the time of order, and may result in a production delay and the need for additional yardage. Our customer service department will contact you under these circumstances.

### CUSTOMIZATION

Architect offers customization of many tailoring aspects available at an upcharge. These include:

- ~ Adding or removing skirts
- ~ Two toned seat, backs or toss cushions
- ~ Adding fringe to cushions
- ~ Changing back cushion styles
- ~ Attach back cushions
- ~ Contrast piping
- ~ Adding or removing piping

\*Customization not available on all styles. Please check with customer service for style availability

# Architect | WARRANTY FEATURES

## ***Frame ~ Lifetime Limited Warranty***

Architect warrants that the frames used in its products will carry a lifetime (25 years) pro-rated\* warranty against defects in materials

## ***Springs ~ Lifetime Limited Warranty***

Architect warrants that the springs used in its products will carry a lifetime (25 years) pro-rated\* warranty against defects in materials

## ***Foam ~ Lifetime Limited Warranty***

The foam products used in Architect seat and back cushions shall bear a lifetime (25 years) pro-rated\* warranty against excessive loss of resiliency. Note that all foam will soften initially and this is considered normal. Each customer should be aware of the proper care for seat cushions including rotating cushions weekly. Do not remove covers for cleaning. This warranty applies to the foam core only and does not apply to feather fill.

## ***Exposed Wood ~ 1 Year Limited Warranty***

Exposed wood parts shall carry a 1 year limited warranty against material defects.

## ***Fabric ~ 1 Year Limited Warranty***

Architect warrants that the upholstery fabric on each piece of furniture shall bear a one year limited warranty against manufacturers defects. This warranty will cover excessive wear and seam slippage under normal usage. This warranty does not cover pilling, fading, shrinkage or soiling. This warranty does not apply to end of line fabrics, close outs, seconds, fabrics treated with after market fabric treatments or fabrics exposed to pets.

\*Pro-rated Formula: Equal to month(s) used divided by month(s) warranted multiplied by current suggested retail price to be determined by Stylus.
